SHIVANI VAIDYA

AI PRODUCT MANAGER

Santa Clara, CA | (206) 295-2163 | shivanivaidyaworkid@gmail.com
LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI product manager with 10+ years in software engineering across cloud security, enterprise data, and distributed systems. Brings customer discovery, product strategy, journey design, implementation-ready specifications, and AI evaluation experience to products that depend on technical depth.

RELEVANT EXPERIENCE

ZenAI.Coach | Founding AI Product Manager

Jun 2025 - Apr 2026 | Remote

- Led product strategy and roadmap execution for a voice-first AI coaching platform, partnering with founders and engineering to launch coaching experiences.
- Defined product vision, user personas, onboarding journeys, feature priorities, AI coach personas, and personalization frameworks.
- Shaped a four-pillar coaching framework into a seven-day journey, including session sequence, user flows, and Figma designs; worked with three engineers to ship V1.
- Interviewed all 25 first-cohort participants and used the findings to prioritize voice, personalization, and storytelling in V2. Completion rose from 3/25 (12%) to 9/35 (approximately 26%) across separate early cohorts.
- Defined and shipped the Digital Twin MVP with one engineer in fewer than 10 days, authoring implementation-ready requirements for APIs, data architecture, and personalization logic. Engineering implemented the MVP.
- Authored PRDs, MVP requirements, user stories, and acceptance criteria, connecting product priorities to AI workflows and memory-driven experiences.
- Defined AI evaluations and partnered with engineering to implement them in DeepEval, uncovering guardrail, context-retrieval, and comprehension failures that informed product and prompt improvements.

CrowdStrike | Engineer - Cloud

Feb 2023 - May 2025

- Led initiatives across cloud security, AI governance, AI asset discovery, and enterprise cloud visibility.
- Partnered with product, engineering, design, and security teams to define requirements and prioritize platform capabilities.
- Developed cloud asset discovery services, APIs, and ingestion pipelines supporting enterprise-scale environments across AWS, Azure, and GCP.
- Led cross-functional development of an AI security intelligence capability, building cloud asset ingestion services that powered customer-facing dashboards tracking AI adoption and security misconfigurations.
- Worked with two internal teams to reconcile latency, data freshness, and security requirements; designed and built a shared asynchronous Go system for retrieving serverless function code across AWS, Azure, and GCP.
- Delivered AI service discovery, adoption tracking, governance, and security intelligence capabilities, and contributed to roadmap planning and architecture strategy.

CrowdStrike | Data Engineer

Aug 2022 - Feb 2023 | Sunnyvale, California

- Worked as a Data Engineer before moving into the Engineer - Cloud role.

Lacework | Senior Member Of Technical Staff

Jan 2021 - Jun 2022 | San Jose, California

- Developed cloud-native security capabilities supporting vulnerability management, threat intelligence, and risk analytics.
- Built microservices, data integrations, and distributed systems using Go, Java, AWS, Snowflake, and Aurora.
- Identified slow APIs through performance testing and optimized Snowflake queries, cutting execution times by 50% or more for multiple queries and improving customer-facing dashboard responsiveness.
- Partnered with product and engineering teams on scalability, customer experience, operational efficiency, reliability, and performance.

IO-Tahoe | Java and Big Data Engineer

Dec 2018 - Apr 2020 | New York, New York

- Developed data governance, metadata management, integration, and analytics solutions for enterprise customers, including Fortune 500 clients.
- Led on-site deployments and integrations for multiple enterprise customers, working directly with stakeholders to identify data discovery challenges and translate needs into engineering requirements.
- Coordinated solutions with internal teams and built backend services, APIs, and distributed data processing systems using Java, Kafka, Spark, and HBase.

EARLIER EXPERIENCE

Barclaycard | Hadoop Developer

Jul 2018 - Dec 2018 | Wilmington, Delaware

- Wrote a Java application to move Oracle data into HDFS in Avro format using Sqoop and configuration files.
- Created Hive partitions for large datasets and wrote HiveQL queries and user-defined functions.
- Generated reports using Spark and Scala, transforming DataFrames and pair RDDs and using Spark SQL to analyze Cassandra data.

Marlabs Inc. | Trainee Programmer Analyst

Jan 2018 - Jun 2018 | New Jersey

- Supported programming and analysis across assigned projects and internal technical tasks, assisting with development, troubleshooting, and documentation under senior guidance.

Open Networking Foundation (ONF) | Member Of Technical Staff

Mar 2017 - Dec 2017 | Menlo Park, California

- Contributed to engineering work supporting networking and open-source technology initiatives.

University of California, Davis | Teaching Assistant

Sep 2015 - Mar 2016 | Davis, California

- Supported academic instruction, student guidance, and course-related coordination.

AppNexus | Software Engineer

Jun 2015 - Aug 2015 | Mountain View, California

- Contributed to software engineering work in a technology environment.

SKILLS & TOOLS

Product: Product discovery, User research, Product strategy, MVP definition, Journey mapping, Roadmaps, PRDs, User stories, Acceptance criteria, Cross-functional leadership

AI: LLMs, RAG, Agentic AI, Prompt engineering, AI personalization, Conversational AI, Semantic retrieval, Vector databases, AI evaluations

Engineering: Python, Go, Java, SQL, REST APIs, Distributed systems, API design, GraphQL, gRPC

Cloud & data: AWS, GCP, Azure, Kubernetes, Docker, PostgreSQL, Cassandra, Redis, MongoDB, Snowflake, HBase, Hive, Kafka, Spark, Hadoop, Apache Beam, ETL pipelines

Tools: Figma, Cursor, Claude Code, Codex, Lovable, LiveKit, Temporal, n8n, Langfuse, DeepEval, Agent Skills (SKILL.md)

DEGREES

Master of Science (M.S.), Computer Science | University of California, Davis | 2016

Bachelor of Engineering (BE), Information Technology | University of Mumbai

CERTIFICATIONS

Professional Certificate in Product Management | Kellogg School of Management, Northwestern University | Dec 2025

AI Agents and Agentic AI in Python: Powered by Generative AI | Vanderbilt University | 2025

The AI Engineer Course 2025: Complete AI Engineer Bootcamp | Udemy | 2025

Machine Learning | Stanford University | 2025

PM Accelerator | Jyoti Nookula

Agentic AI | Jyoti Nookula
